About Your Knife

Your knife was handcrafted in Middleton, Idaho with the finest materials.

Description:	B1 Bowie Camp Knife
Blade Material:	Forged from High Carbon Oil Hardening O1 Steel 1/4" thick
Handle Material:	Stabilized Box Elder Scales with Toxic Green & Black G10 Liners
Fittings:	Copper pins and a Mosaic Pin with a Copper Guard
Date Complete:	August, 2024
Maker's Comments:	Blade cutting edge is ~7 inches (17.9 cm) and overall length is ~12 inches (30.5 cm). The blade height is ~1.375 inch (3.5 cm) edge to spine. Blade spine thickness at plunge line is ~0.168 inches (4.3 mm). Knife comes with a hand-made custom fitted leather sheath to protect the scary sharp edge.

Your knife will last a lifetime if properly cared for. Here are some guidelines for care and maintenance:

- Always wipe and dry your knife after use.
- Store your knife in a block or sheath for safety.
- Wash with warm soapy water, rinse and dry immediately.
- Like all fine knives, do not put in a dishwasher.
- Do not place your knife in an oven and avoid high heat.
- Do not strike the knife with another metal object.
- Avoid dropping your knife on to hard surfaces such as sinks, concrete or tile floors.
- Sharpen your knife with an oil or water stone and hone with a strop for razor sharpness.

The handle of your knife is made of a naturally dense and oily wood. It is very durable, but not indestructible. Do not subject the handle to excessive heat, direct flame, acidic or caustic solutions or long-term submersion in liquid.
